- Safekeeping of the product's quality
- Energy saving

DOCK SHELTERS

DOCK SHELTERS TECHNICAL FEATURES

- Flaps made from 3mm thick PVC sheets, reinforced by two layers of polyester fibers.
- Side covers made from durable 1mm thick PVC sheets.
- Galvanized metal frame, equipped with crosswise type arms and springs, which allows horizontal deflection and return of the front section, when the truck is not set properly at the loading dock.

DOCK SHELTERS ADVANTAGES

- Full flexibility and ability of the galvanized mechanism to return to its original position.
- Horizontal deflection.
- Readily available, standardized dimensions for small and large trucks.
- Easy and fast assembly, in place, even by the inexperienced staff.
- Durability
